

new

The new acurata crown cutter

EKR-„RR“ with unmatched cutting performance

- the new innovative cutting edge geometry – cuts even the hardest alloys quickly and efficiently
- ideal to remove old crowns and fillings
- one-piece tungsten carbide construction
- precise concentricity

EKR – “RR”

Ref. 500 314 139 RR 012

Total length: 20 mm

Head length: 4 mm

Diameter: 1,2 mm

Recommendations for use and safe operation

- Make sure that your handpiece is in good working condition
- Optimum speed 80.000 – 120.000 min⁻¹
(red contra-angle with 50% engine performance recommended)
- Use only minimal contact pressure
- Do not press too hard (otherwise the instrument can slip out of the chuck)
- Do not lever or wedge
